MARRIAGES	240	330	300	305	350	320	325	304	230	320	250	300	3,574	9.47

The 2017 vital events data are provisional. They represent registered events which were captured from the Date Range (date event occurred) records of the Registrar General's Department. Date Range records are all events registered within three years from the actual date the event took place. Example, a birth which occurred in 2009 can be registered in 2012 and be included in the Date Range record for 2009. Provisional data for a given period may not accurately reflect the final number of events registered.

Marriages in Tables 1, 2 and 5 include the total number of resident and non-resident marriages. Divorce data in Table 1 are compiled from Supreme Court records in Freeport, Grand Bahama only. Divorces for New Providence (Nassau) are not available at this time.

Deaths in this report include all mortalities except still births. Natural Increase represents the number of livebirths minus the number of deaths for a particular period.

Rates of all vital events are estimated on the number for a one year period. Infant death rates are deaths under one year per 1,000 live births. Rates for live births, deaths, marriages and divorces are per 1,000 population.

**BIRTHS, DEATHS AND MARRIAGES  
BY ISLAND OF OCCURRENCE: January - December 2017**

TABLE 2

ISLAND OF OCCURRENCE	BIRTHS	DEATHS	MARRIAGES
