## PREFACE

The Department of Statistics is pleased to release the results of the 2010 Census of Population and Housing. The 2010 Census is the 19th decennial census to be conducted in The Bahamas. This publication is the third in a series of publications that will present the final results of the 2010 Census of Population and Housing.

The planning and execution of The 2010 Census were carried out mainly by the staff of the Department of Statistics. For this and previous censuses, The Bahamas participated in a joint census program for the English-Speaking Caribbean Countries. As a result, the planning followed guidelines that were established by the Regional Census Coordinating Committee (RCCC). Therefore, the concepts and definitions used in this and previous censuses allow for comparability at both the regional and international levels as well as with earlier censuses.

This report will provide tabulations based on the final data from the migration section of the census questionnaire, and present the main findings from the information collected. Three questionnaires were used to collect information for both the individual and the dwelling unit:-

1. Individual Questionnaire which was completed for every person residing in The Bahamas at the time of the census.
2. Institutional Questionnaire which was used to collect data on persons residing in collective dwellings or institutions.
3. Housing Questionnaire which was completed for private and collective dwellings.

Data derived from the individual questionnaire relating to the age, sex, marital status, union status, religion, racial group, citizenship, educational characteristics and employment status of the migrant population are presented in this report. Data resulting from the housing questionnaire relating to private dwellings, households, head of households, type of households and type of dwelling structure are also presented in this report.

## **Acknowledgements**

The Department of Statistics extends sincere, gratitude to the many individuals and organizations that assisted and contributed to the success of the census.

To the Bahamian Public, without whose assistance and co-operation, the taking of the census could not have succeeded and all others who have participated in or contributed to the Census program, we extend our sincere thanks and gratitude.

Thanks to Mrs. Leona Wilson our Deputy Director for running and editing tables ad infinitum.

Sincere thanks to Ms. Latoya Johnson and Mrs. Jasmine Brown-Davis of the Census and Social Statistics Section of The Department of Statistics, for the endless editing and formatting of the numerous tables that are contained within this report.

## Technical Notes

Internal Migration is principally concerned with the movement of people from one area of a country to another area of the same country. The Internal Migration data in this report references the intercensal periods 2000-2010 and 1990-2000.

Persons should be cognizant that although some individuals may have made more than one move during the ten year period, only that movement which brought them to their usual place of residence on Census day was recorded.

In order to appreciate the data presented in this report, it is important to have a clear understanding of the concepts and definitions on which the census questions were based. The concepts and definitions were in keeping with the United Nations (UN) “Principals and Recommendations for Population and Housing Censuses, Revision 2”.

Migration was considered a core topic by the UN and as such must be included on the census questionnaire. The recommended questions for capturing the internal migration data along with the concepts and definitions are listed below:-

- 1. Where were you born (place of birth)** - this question seeks to determine whether an individual was born in The Bahamas or abroad (a foreign country).
- 2. Which island or country was this** - this question seeks to obtain the name of the island (if you were born in The Bahamas) or the name of the country (if you were born abroad)
- 3. Have you ever lived abroad** - regardless of place of birth, this question seeks to determine whether an individual lived abroad (in another country during his/her lifetime). The individual must have lived abroad for at least 6 months. **Note:** - this question does not refer to persons who were currently studying or have studied abroad for a specific period of time.
- 4. In which country did you last reside** - this question seeks to find out the most recent country an individual lived in prior to living in The Bahamas.
- 5. In what year did you last come to The Bahamas to live** - once an individual has lived abroad in another country for at least 6 months, this question seeks to find out the most recent year an individual came to The Bahamas to live.

- 6. Did you ever live on another Bahamian Island** - regardless of place of birth this question seeks to find out if the individual lived on another Bahamian Island prior to the island that they are currently residing on at the time of the census.
- 7. Which Island was this** - the exact island the individual lived on prior to the one he/she is currently residing should be stated.
- 8. Which year did you move to this island** - the exact year the individual moved to the island on which he/she is currently residing.
- 9. Country of citizenship** - citizenship is the legal nationality of each person. A citizen is a legal national of the country of the census; a foreigner is a non-national of the country. The country of citizenship is not necessarily identical to the country of birth.
- 10. Method by which citizenship was acquired** - How did you obtain your citizenship?  
Were you born to parents that were legal nationals of the country in which you reside; were you born in the country of residence to non nationals or married to a legal national of the country in which you reside etc..

## DATA HIGHLIGHTS

### INTERNAL MIGRATION

This brief analysis is intended to provide accurate information on the population losses and gains, due to movement among the islands, experienced by each island between 1990 and 2010 with concentration on the ten year period, 2000-2010. Two types of data on internal migration, namely, “Place of Usual Residence” and “Place of Previous Residence” have been used in conjunction with other relevant variables (e.g. age, sex etc.), to produce the tables presented in this report.

According to the data collected in the 2010 census, for the period 2000-2010 some 26,929 persons changed their usual place of residence within the country, compared to 28,964 during the period 1990-2000, a decline of seven percent (7%). Five year mover rates covering the two decades are presented in **Table (i)**. The information shows that for the first five years of each decade there was a decline in movement for each period. There was more movement of persons during the last five years of each decade resulting in a point six percent (0.6%) decline between the two decades 2005-2010 and 1995-2000, however, although the movement of persons was less during the first five years of each decade (2000-2005 and 1990-1995) the decline(1.3%) was greater.

**Five Year Mover Rates: 1990-2010**

Table(i)	All Bahamas		
Migration Period	Total Population	Total Number of Movers	Mover Rate
<b>2005-2010</b>	351461	15,641	4.5
<b>2000-2005</b>	325200	11,288	3.5
<b>1995-2000</b>	303611	15,561	5.1
<b>1990-1995</b>	278867	13,391	4.8

**Note: Total Population refers to institutionalized and noninstitutionalized resident population. The movement question was asked of both types of population.**

**Table (ii)** shows the number of movements into and out of each island and the net domestic loss or gain of each island. During the period 2000-2010, only five (5) islands; New Providence, Abaco, Exuma and Cays, Harbour Island and Long Island showed a net gain of population. The island losing the most population during the period was Eleuthera.

New Providence was the largest recipient of internal migrants accounting for 43.3% of the migrating population according to **Table (iii)**. Of the 11,651 persons who moved to New Providence 30.3% of them were from Grand Bahama, these same migrants to New Providence represented 62% of the persons leaving Grand Bahama during the period.

In addition to Grand Bahama, Eleuthera 14.4%, Andros 13.5%, Exuma 11.6% and Abaco 10.7% were the main islands from which persons moved to New Providence, collectively accounting for more than three quarters (81%) of movers to that island (**Figure 1**).

**Figure1**

Grand Bahama had the second largest intake of island migrants as seen in **Figure 2 and Table (iii)** the distribution of the intake were as follows:- New Providence 62.2%, Abaco 15.9%, Andros 5.4% and Bimini and Exuma and Cays with 4.1% each. Grand Bahama, however, was one of the top four islands experiencing net losses, in this instance -698 of its' population during the period **Table (ii)**.

**Figure 2**

## Mover Characteristics

### Age and Sex

Overall, 70% of the movers were between 15 and 49 years of age, 18% were aged 0-14 years, 9% were aged 50-64 years and 3% were aged 65 years and over **as presented in Table (iv)**. Of the persons between 15-29 years of age, 51% moved to New Providence with an additional 16.6% and 9.5% moving to Grand Bahama and Abaco respectively. The sex distribution of the movers was almost equal, 51.1% males and 48.9% females. Male movers however, were far more dominant in the 30-49 and 50-64 age groups **see Table (v)**.

## APPENDIX II

## CONCEPTS AND DEFINITIONS

# APPENDIX II

## 2010 CENSUS OF POPULATION AND HOUSING

### CONCEPTS AND DEFINITIONS

#### Concepts and Definitions

The concepts and definitions on which the Census questions were based were in compliance with the guidelines established by the Regional Census Coordinating Committee (CRCC). This was to allow for comparability at both the regional and international levels as well as with earlier census results.

#### 1. Census Day

Census Day was Monday, May 3, 2010. This was the reference day and therefore, all questions on the questionnaire (excluding the economic activity and fertility) referred to the circumstances existing on this particular day. Field enumeration began on Tuesday, May 4th.

#### 2. Record of Visits

This is the record of the list of households and the composition of these households which was kept by the enumerator. It also serves as a register of all households, business places and institutions in The Bahamas. This register is used as a frame for the designing of Household and Business Surveys carried out in the intercensal years.

#### 3. Population

##### **The Total Population consisted of the following:**

- (i) Persons in their usual place of residence on Census Day eg. family members, lodgers and live-in employees
- (ii) Persons who were temporarily away on a business trip, on vacation or away at school or university
- (iii) Persons in hospitals or other institutions
- (iv) Newborn babies in hospital (born by Census Day – May 3<sup>rd</sup>)
- (v) Persons with no fixed place of abode
- (vi) Bahamians serving in the diplomatic corps who were resident abroad
- (vii) Spouses who worked on another island but come home periodically.

#### **4. Supervisory District**

A geographical area (synonymous with the 2010 political boundaries) for which data were collected. These geographical areas consist of smaller areas called enumeration districts.

#### **5. Household**

The term ‘household’ refers to a person or group of persons who live in a private dwelling unit. The concept of “household” is based on the arrangements made by persons individually or in groups for providing themselves with food and other essentials for living. Anyone of the following may constitute a household.

- (i) a person living alone
- (ii) one or more family(ies) with or without lodgers or servants
- (iii) a group of unrelated persons living together
- (iv) occupants of an institution, hotel, convent, etc.

#### **6. Head or Reference Person of Household**

This is the person who was acknowledged by the interviewee and other members of the household to be the head of the household.

#### **7. Family**

For Census purposes, the following constitutes “Families”:

##### **ALL MEMBERS RELATED:**

- Nuclear family includes two married parents and their biological or adopted child/children living in the same household.
- Married couple, with or without child/ children (The children may be of one or both parents as long as these children are not married, nor separated, nor living with a partner, nor do they have any children living in the same household).
- Unmarried couple (common law union), with or without children
- Mother with child/ children
- Father with child/ children

- Adult child/ children with live-in parent(s) only; (adult child is not married, not separated nor living with a partner. However, he/she can be divorced.)
- Adult child/ children with live-in parent(s) with other related persons under 18 yrs old (These related persons under 18 years old will be considered as dependents of child/children).
- Other adult relatives living with a child/ children under 18 yrs old. (i.e. grandparents with guardianship of minors; Aunt/ Uncle with a niece/ nephew under 18 yrs; Adult siblings with guardianship of younger siblings under 18 yrs, etc)
- Other relatives living together, none of whom constitute a family nucleus (all 18 yrs and older) – siblings only.

**NOT ALL MEMBERS RELATED:**

- Adult child with live-in parent(s) with other persons under 18 yrs old; (some or none are related to the nucleus, i.e. the family reference person or the live-in parent)
- Adult living with other persons under 18 yrs old; (all or some are non relatives).

**8. Marital Status**

“**Marital Status**” is the personal legal status of each individual in relation to the marriage laws or customs of The Bahamas. The marital status options were as follows:-

**Never married:** a person who is single and has never been legally married.

**Married:** a person whose marriage has gone through a legal marriage ceremony in accordance with the law.

**Widowed:** the individual was legally married but his/her spouse has died.

**Divorced:** the individual was legally married but has gone through legal proceedings for the marriage to be officially dissolved.

**Legally separated:** applies to a married couple living apart as a result of the decision of the court or legal system of the country.

**9. Union Status**

Union Status is the type of relationship that a man or woman was currently engaged in at the time of the census. The information obtained provides for further study on family formations, that is, how families are

formed, the type of relationships children are born into and how children are being cared for in the home. The options were as follows:

**Not in a union:** the individual is not living with a partner, nor has he/she ever been legally married.

**Legally Married:** refers to a union in which an individual is currently living with the spouse to whom he/she is legally married to. Exceptions:

- (i) spouses who are temporarily apart for work purposes or other unavoidable circumstances
- (ii) Migrants who are residing in The Bahamas but their spouse lives in another island/country.

**Common-law Union:** the partners share a common household even though the union has not been established by a legal process. This union/ relationship have nothing to do with the individual's marital status.

**Visiting Partner:** refers to both males and females 15 years and older who have fathered or had child/ren in the last 12 months prior to Census Day. During the 12 month period that the child/ren was conceived, the parent was not currently living with a spouse or partner.

**Married but not in a union:** this person has been legally married but is currently living without a spouse/partner.

**Legally separated and not in a union:** this type of relationship/union refers to a person who has been married but is legally separated and is currently living without a partner.

**Widowed and not in a union:** this person has been legally married but due to the death of the spouse, they are widowed and is currently living without a partner.

**Divorced and not in a union:** this person was legally married but is currently legally divorced and is presently living without a partner.

## **10. Total Household Income**

This is the aggregate income of all members of the household from all sources, which was earned, gained or obtained during the past 12 months. This includes income from wages and salaries, as well as income from property or other investments, private educational scholarships, pensions, welfare, alimony, child support, etc.

## **11. Building Unit**

A building is any independent, free-standing structure comprising of one or more rooms or other spaces, covered by a roof and usually enclosed within external walls which extend from the foundation to the roof.

A building may be used or intended for residential, commercial or industrial purposes or for the provision of services. It may therefore be a factory, shop, detached dwelling, apartment building, shopping centre, church, repair shop, etc.

## **12. Dwelling Unit**

To be classified as a dwelling, living quarters must be structurally separate and must have a private entrance either from the outside or from a common hall, lobby or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

### **Examples of dwellings are:-**

- (1) Single Detached/ Single house**
- (2) Single Attached (Dwelling units only)**
  - (a)** each half of a duplex, triplex, etc
  - (b)** a large building that has been structurally sub-divided to contain more than one housing unit. Eg.  
A large house which has been converted into several units.
- (3) Part of a Private Dwelling:** a self-contained private dwelling which has been partitioned off from other spaces in a single house.
- (4) Apartment/Flat (dwelling units only):** this type is usually found one on top of the other, that is, the floor of one is the roof of the other.
- (5) Townhouse:** this is a self-contained unit (usually in blocks of units) with separate legal title to ownership. They may stand alone or attached (joined to another townhouse).
- (6) Dwelling attached to a Business:** a dwelling or dwellings adjoining a store or other commercial unit.
- (7) Other:** Any type of living quarters which does not easily fit into any of the groups outlined above. For example, boat, bus, trailer, etc.

## **13. Types of Living Quarters**

For Census purposes, dwellings were divided into two (2) main groups as follows:

- (i) PRIVATE DWELLINGS** are those in which a family or other small group of individuals reside, such as a single house, apartment/flat, or townhouse.

- (ii) **COLLECTIVE DWELLINGS** included such special types of dwellings as hotels, institutions (eg. hospitals, the prison, military barracks, convents, children and old folks' homes, etc) and other group quarters in which fairly large numbers of unrelated persons are likely to reside.

#### 14. The Status of Dwellings

Dwellings can be categorized as follows:

1. **OCCUPIED** -- during the period of the census, persons were currently living in the dwelling unit.
2. **VACANT** -- any dwelling unit which is suitable for occupancy but was unoccupied at the time of the census.

#### 15. Status of Vacant Dwellings:-

1. **Winter Residences:** private dwellings that are owned by persons from abroad.
2. **Secondary Residences (Domestic):** private dwellings that are owned by Bahamians.
3. **For Rent:** private dwellings which are "For Rent".
4. **For Sale:** private dwellings which are "For Sale".
5. **Other:** included seasonal vacancies such as vacation or holiday homes, time-share units and seasonal workers' quarters/complexes (dwellings used to house temporary residents/workers of a project).

#### 16. Types of Tenure

**Tenure** refers to the right or title by which a dwelling is occupied. The types of tenure are as follows:-

**Owned fully:** means that the dwelling is fully paid for i.e. no mortgage/claim exists for the dwelling.

**Owned (mortgage):** a dwelling which is not fully paid for such as one which has a mortgage or some other claim to it.

**Rent:** the dwelling does not belong to any member of the household and payments are made monthly for occupancy of the dwelling unit.

**Rent Free:** no member of the household pays rent for occupancy of the dwelling. The dwelling is provided free of charges, whether or not in return for services rendered e.g. parsonage or government housing.

**Lease:** a contract in which a dwelling is being used or occupied; an option of buying may or may not exist. Usually, the total sum and time period are stipulated in the contract.

**Other:** any other type of tenure not listed above. An example “squatting” wherein households were found occupying a dwelling unit without permission of the owner and without any rights to the dwelling.

## **17. Shelter Cost**

The cost of occupying a dwelling unit is regarded as the shelter cost. In the case of units owned (mortgage), it is the monthly mortgage payments; in the case of rented units, it is the monthly rent and lease, it is the yearly leased payments, etc.

## **18. Water Supply**

### **Piped Water**

“Piped water” is water which is piped into the dwelling or yard and can be controlled by a tap.

**Public Piped:** water that is piped through public mains or is obtained from any other public source (eg. well, tank, etc) outside the private lot on which the dwelling is situated.

**Private Piped:** water that is piped from a private well, spring or other private source located on the property on which the dwelling is situated.

### **Not Piped Water**

Water is not piped into the yard or dwelling unit.

**Public Not Piped:** can either be a public well or tank at a central location in the community that is accessible to everyone or a public standpipe or hand pump on the side of the road.

**Private not Piped:** this water source is usually a well that is owned by the householder and is situated on the private property.

## **19. Economically Active Population**

The economically active population is that segment of the population, fifteen years of age and over, engaged in or willing and able to be engaged in the production of goods and services. It is composed of those persons with jobs – the employed, and those persons without jobs but who were engaged in some job-seeking activity four weeks prior to the census. Included in this population were:-

- (i) Persons who had jobs and were at work during the reference week.
- (ii) Persons who had jobs but were absent from work during the reference week because of illness, vacation, labor disputes, weather conditions, etc.
- (iii) Persons who at the time of the enumeration had never worked before and were actively seeking work during the reference week.
- (iv) Persons who had previously worked, however, at the time of the enumeration, were not working but were actively seeking work during the reference week.

Groups (i) and (ii) constitute the employed labor force and groups (iii) and (iv) represent the unemployed labor force.

## **20. Non – Economically Active Population**

The non-economically active population is that portion of the population fifteen years of age and over who were not engaged in the production of goods and services during the census reference week; nor were they seeking to be engaged during the four weeks prior to census reference week. This population included the following groups of persons:-

- (i) **Homemakers** – persons who during the reference week were engaged in general housekeeping duties (within their own homes) for which they did not receive pay.
- (ii) **Students** – persons who were attending an educational institution on a full time basis during the reference week.
- (iii) **Retirees** – persons who had terminated their employment and were not seeking work during the reference week.
- (iv) **Disabled** – persons who were incapacitated in some form and therefore were unable to work or seek work during the reference week.

- (v) **Other** – persons receiving public aid or private support and others not falling into any of the above categories.

**21. Type of Industry**

This refers to the type of work in which the individual was primarily engaged during the 12 months preceding census.

**22. Type of Occupation**

This is the type of work which was performed by the individual during the 12 months prior to the census and refers to his main job.
