# PREFACE

The Department of Statistics presents this report in a series of Foreign Trade Quarterly Reports which is published within the quarter immediately following.

The report contains tables that provide data on the value and volume of Trade between The Bahamas and the rest of the world. The data are collected by The Bahamas Customs Department and are forwarded to the Department of Statistics where they are processed, analyzed and published by the Foreign Trade Section of the Department of Statistics.

The data in this report are provisional and represent data available at the time of publishing; therefore it is subject to changes when tabulated for the Annual Report.

## **Data Notes and Explanation**

### **1. Data Source**

The source documents of the statistics in this report are the Customs import entries, declarations and export documents submitted by importers and exporters, which are subject to verification and approval by The Bahamas Customs Department.

### **2. Coverage**

As recommended by the United Nations International 'Merchandise Trade Statistics Manual', and to the extent possible, the General Trade System is used for the recording and compilation of external trade statistics for The Bahamas. This system covers all types of inward and outward movement of goods through a country or territory, including movements through warehouses and free zones. In essence, it includes all merchandise that either add to or reduce the stock of material resources of a country or territory by entering (imports) or leaving (exports) the country's economic territory.

### **3. Transaction Values**

The value of imports are c.i.f., that is, the value at the port of importation including freight and insurance charges and other charges incidental to the delivery at the port of import.

The values of exports are f.o.b., that is, the value of goods including the cost of transportation and insurance to the border of the exporting country.

The values presented are Bahamian dollars and the exchange rates prevailing at the time of importation are used in converting foreign currencies.

### **4. Changes/Exclusion to Presentation of Trade Data**

Excluded from the compilation of the foreign trade statistics are the goods traded that do not make any changes to the wealth and material resources of the country. Examples of such goods are crude oil, residual fuel oils and certain chemicals temporarily imported for storage purposes only.

## 5. Commodity Classification

The classifications of goods used in this report are the Harmonized Description and Coding System, better known as the Harmonized System (HS) and the Standard International Trade Classification (SITC). The HS arranges goods according to their degree of manufacture and classifies them into ninety-seven chapters which are grouped into twenty-one sections. Section twenty-two was added to accommodate local trade. The SITC on the other hand, arranges goods according to their stage of production. The SITC contains sixty-seven divisions which are condensed into ten sections.

### Definitions and Abbreviations:

**Imports** – Goods imported from foreign countries for further processing or local consumption.

**Domestic Exports** – Goods produced or manufactured locally and exported to foreign countries.

**Re-exports** – goods exported in the same condition as when imported from a foreign country

**Balance of Trade** – is the total export minus the total import. It is usually calculated totally for a country or for each trading partner.

**Port of Entry** – a port that serves as a first port of entry from an international port.
