

MISSION STATEMENT

To ensure that the Bahamian Government, Business and people are never hampered in their activities by any inadequacies of statistics, their recent trends or their interpretation; and in particular to ensure that the managers of the Bahamian economy in the Ministry of Finance, The Central Bank and elsewhere, never lack adequate statistics nor argue about them.

PREFACE

This publication presents data on the value and volume of trade between The Bahamas and the rest of the world. It contains a five year series of summary data to provide an historical view of trade for The Bahamas during that period. Detailed tables (both annual and quarterly) of the year 2016 are presented in order to provide an in depth view of trade for that year.

Reports on trade statistics for The Bahamas have been published since 1968 and have undergone many revisions in both the format of the report and the methodology of the compilation of the figures. Initially, trade statistics were compiled using the Standard International Trade Classification (SITC), which classifies commodities by two criteria (1) the material of which the commodity has been made and (2) how the commodity will be used. This classification, subjected to periodic revisions, is still used today, though not predominantly.

The Harmonized System (HS) was adopted by the Customs Co-operation Council in June 1983 and enforced by the HS Convention in 1988. In 1993, the United Nations Statistical Commission, at its 27th session recommended that countries adopt the HS for the compilation and dissemination of their international trade statistics. In The Bahamas, however, the Customs Department did not implement the HS until July 1996 and the Department of Statistics followed suit in January, 1997. Since its implementation, the HS has been regularly revised, the latest having occurred in 2012 and implemented in July 2013. As a result the figures in this 2016 report are reflective of the 2012 revision of the HS code.

The data in this report are collected by the Bahamas Customs Department and are forwarded to the Department of Statistics where they are processed, analyzed and published. Both the SITC and the HS system of commodity classification are used in the presentation of the data.

Data Notes and Explanation

1. Data Source

The source documents of the statistics in this report are the Customs import entries, declarations and export documents submitted by importers and exporters, which are subject to verification and approval by The Bahamas Customs Department.

2. Coverage

As recommended by the United Nations International 'Merchandise Trade Statistics Manual', and to the extent possible, the General Trade System is used for the recording and compilation of external trade statistics for The Bahamas. This system covers all types of inward and outward movement of goods through a country or territory, including movements through warehouses and free zones. In essence, it includes all merchandise that either add to or reduce the stock of material resources of a country or territory by entering (imports) or leaving (exports) the country's economic territory.

3. Transaction Values

The value of imports are c.i.f., that is, the value at the port of importation including freight and insurance charges and other charges incidental to the delivery at the port of import.

The values of exports are f.o.b., that is, the value of goods including the cost of transportation and insurance to the border of the exporting country.

The values presented are Bahamian dollars and the exchange rates prevailing at the time of importation are used in converting foreign currencies.

4. Changes/Exclusion to Presentation of Trade Data

Excluded from the compilation of the foreign trade statistics are the goods traded that do not make any changes to the wealth and material resources of the country. Examples of such goods are crude oil, residual fuel oils and certain chemicals temporarily imported for storage purposes only.

5. Commodity Classification

The classifications of goods used in this report are the Harmonized Description and Coding System, better known as the Harmonized System (HS) and the Standard International Trade Classification (SITC). The HS arranges goods according to their degree of manufacture and classifies them into ninety-seven chapters which are grouped into twenty-one sections. Section twenty-two was added to accommodate local trade. The SITC on the other hand, arranges goods according to their stage of production. The SITC contains sixty-seven divisions which are condensed into ten sections.
